

Traveller Buddy - Startup Plan

Feature 1: Local Guides Connect

Local guides can connect to this platform.

- Every guide has to pass a basic test to become a guide.
- It can be another source of income for locals and will generate jobs too.
- Travellers/visitors can see guide profiles, ratings, education, and their price to book them.
- This will provide a competitive edge for new people.
- Pricing will be more reliable.
- Travellers can find their own language guide buddy.

App Interface

1. **Register for a guide:** AI Test, Mock Test.
2. **Guide Profile:** Age, Education, Review.
3. **Book a guide buddy.**
4. *Price will be negotiable. (Note: Marked as crossed out in the original notes)*
5. **Location and Graph Interface:** The app interface will have location images and a graph interface, so guides keep marking as they cover and explain. This ensures that travellers can re-visit, memorise, and understand, "I've covered these places in a sequence." This graph will also have a little description and a notes section where travellers can add their own notes too.

Reduces

- Local fear of digital visibility.
- Dependency on intermediaries/agents.
- Irregular income opportunities.

Feature 2: Smart Trip Planner (AI Integrated)

Day-wise itinerary creation.

- Users can create their day-wise planning.
- The user will provide their availability days.

Free Service

- Provides the adjustable, editable graph roadmap only.

Paid Service (Adjustable & Editable)

- If the user won't be able to follow the day plan, it will re-generate the map again.
- Users can give their priority list to visit or specify time to spend more at any place.

- Will suggest nearby food restaurants, hotels, and bike rentals.
- Users can edit the day-plan graph (time, priority list to visit).

Feature 3: Historical Places Audio Guide

- **Capture a picture of historical places and upload it.**
 - *Fallback Option:* Select a city name or place name if the AI doesn't recognize the image.
- It will create an audio guide about the historical places.
- Will also suggest some online YouTube videos about the place (optional).

Feature 4: Expense Management

- All features of Splitwise, except email notification.
- Travellers can create a group where they can add their expenses and history to record their payments.
- This feature will be free.
